

Air-Row F-18R (Round) For Open Rafter Systems

The round version of Air-Row's popular F-18 fan is designed for spaces beyond the warehouse that require a more sophisticated and aesthetically pleasing look. The round version achieves the same high-quality results as our traditional box F-18, pushing air down in a one column no wider than 2' to 3' from as high as 40' up. These fans are fire safe, with a thermal cut-off to shut the fan down in case of fire.

Model	Size	RPM	CFM	Watts	Volts	Weight
F-18R white	12"x12"x18"	1550	600	31	120V/60CY	8.1 lbs
		1300	600	20		
		900	600	8		

CFM readings are based on our current RPM and blade configurations.

New F-18R comes in various lengths and can be powder coated or painted.

You can even add your logo or advertising message!

Air-Row can tailor to your custom specifications.

Bottom Line Advantages

- Reduces HVAC system energy usage by 25%
- Increases equipment life and reduces repairs; parts easily replaced and serviced
- Promotes warm and dry floors, reducing potential for accidents
- Solves typical problems such as fogging on doors and windows, mold growth, and hot and cold spots
- Creates more even, consistent temperatures to ensure the comfort of customers and employees

Ideal Applications

- Entrances and vestibules
- Supermarkets and convenience stores
- Warehouses and industrial spaces
- Retail stores
- Restaurants
- Churches, schools and universities

Features and Options

- Patented, 3-year warranty
- Speed Control – 3-speed programmable EC motor, thermally protected, comes with both on/off and 3-speed switch, which may be factory preset. Integrated circuit available to interface with BAS.
- Air Purification – Air-Row's new system improves air quality by reducing odors, gases and bacteria.

Under Development

- Factory installed thermostat
